

Bentrio® product information

<p>BENTRIO®</p> <p>What is Bentrio®? Bentrio® is a gel emulsion which is applied as a nasal spray for self-protection. It is intended to help protect yourself against allergens such as pollen, house dust mites or animal dander which are inhaled through your nose.</p> <p>Bentrio® is free of any medication such as antihistamines or steroids and does not contain any preservatives.</p> <p>How does Bentrio® work? The nasal cavities are lined with mucosa which serves as the body's first line of defence against inhaled particles such as pollen, house dust mites or animal dander. The nasal mucosa acts as a protective barrier against these particles; it secretes mucus which traps particles for clearance via the throat. Its protective function may be compromised by nasal dry-ness or irritation (e.g. due to low air humidity, certain nasal sprays) or mucosal damage. Also, it may be overwhelmed by the quantity or infectiousness of inhaled particles. Bentrio® protects the nasal mucosa in three ways:</p> <ul style="list-style-type: none">- forms a thin protective layer on the nasal mucosa- binds inhaled particles through electrostatic effects- humidifies the mucosa and thus aids its functionality <p>The gel formulation of Bentrio® has been designed for extended residence Bentrio® is cleared from the nasal cavities over time into the throat and eliminated via the digestive tract.</p>	<p>Apply Bentrio® prior to potential exposure to airborne allergens.</p> <p>Blow your nose gently. Shake the bottle vigorously five times up and down.</p> <p>Remove protective cap. Prime pump prior to first use by actuating it repeatedly (point away, in the air or towards a tissue) until a full spray appears.</p> <p>Bend head slightly forward, insert spray tip as far as possible and hold bottle upright while actuating firmly 1 or 2 times.</p> <p>Repeat application in the other nostril. Wipe spray tip and put on cap.</p> <p>Upon application of Bentrio® you may feel a slight, transient sensation of a congested nose. Later, you may feel a slight, transient sensation of the formulation in your throat as Bentrio® is cleared from the nasal cavities.</p> <p>If you blow your nose or if you sneeze, Bentrio® should be re-applied. If using a medicated nasal spray, use prior to Bentrio®.</p> <p>Instructions for safe use After each use, wipe the spray tip thoroughly with a clean, dry, unused tissue and put on the protective cap. Do not share Bentrio® with other users to avoid potential contamination. Do not use if tamper-evident seal is broken or missing.</p>
<p>Indications for use</p> <p>Prevent the onset and alleviate allergic symptoms caused by airborne allergens such as pollen, house dust mites or animal dander.</p> <p>Ingredients</p> <p>Purified water, glycerides, mixed decanoyl and octanoyl (MIGLYOL® 812 N), propylene glycol, bentonite, glyceryl mono and dipalmitostearate (GELEOL® Mono and Diglycerides), xanthan gum, disodium EDTA, mannitol, citric acid, butylated hydroxyanisole, vanillin.</p>	<p>Safety and potential side effects Bentrio® has no pharmacological, immunologic, or metabolic effects. All ingredients have a well-established safety profile and have been used for many years in other medical devices or drug products. Clinical testing confirmed that Bentrio® is well tolerated. In case of side effects, you should stop treatment immediately. If symptoms persist, you should seek medical attention.</p> <p>Keep out of reach of children.</p>

Who can use Bentrio®?

Bentrio® is suitable for adults and children from 6 years of age under supervision of parents or other caretakers.

Contraindications

Do not use Bentrio® if you ever had an allergic reaction to any of the ingredients or if you have a wound or ulcers in your nose.

How to store Bentrio®

Store between 8°C and 30°C. Do not freeze. Use within 6 months of first use and before the expiry date shown on the spray bottle.

How to use Bentrio®

Apply 1-2 sprays per nostril 3 times per day or as needed (not more than 8 sprays per nostril and day) for not more than 30 days in a row. Bentrio® has been shown to provide clinically relevant protection against pollen for at least 3 hours. Apply Bentrio® prior to potential exposure to airborne allergens.
